Greg –

The 2019 RFF Ensafe groundwater monitoring report and another “forensic” report with isotopic analyses are available on the EPA site webpage.

The URL

is: <https://cumulis.epa.gov/supercpad/SiteProfiles/index.cfm?fuseaction=second.scs&id=0905945&doc=Y&colid=37080®ion=09&type=SC>

Greg –

One of the forensic reports should be on the webpage. It’s dated 5/2/16. Try

this: <https://cumulis.epa.gov/supercpad/SiteProfiles/index.cfm?fuseaction=second.scs&id=0905945&doc=Y&colid=37080®ion=09&type=SC>

I’ve attached the second forensic report, dated 7/30/19.

The third forensic report and 2019 report were recently submitted to EPA as drafts. I want to give them a quick review before I share.

Good Afternoon Wayne,

Thank you for the update you provided at the Rialto-Colton Perchlorate Task Force last week. Would it be possible for you to provide copies of the 3 forensic reports and the 2019 Annual Sampling report you described? I checked the website, but didn't see it.
